2.0 SUMMARY

3.0 BACKGROUND

3.1 The Proposal

Site Location Map

3.3 Existing Development Potential

The property is zoned RU1 – Large Lot Housing. The purpose of this zone is to provide for single detached housing as a principal use, and compatible secondary uses, such as bed and breakfast homes, minor care centres and group homes, as well as home based businesses.

Secondary suites are allowed on lots with RU1s – Large Lot Housing with Secondary Suite zoning.

3.4 Current Development Policy

3.4.1 Kelowna Official Community Plan

The proposal is consistent with the designation of Single/Two Family Residential in the Official Community Plan future land use designation. The Single/Two Family Residential designation covers single detached homes for occupancy by one family, single detached homes with a secondary suite, semi-detached buildings used for two dwelling units, and complementary uses (OCP, Chapter 15).

3.4.2 City of Kelowna Strategic Plan (1992)

One of the objectives of the Strategic Plan is “to develop a more compact urban form by increasing densities through infill and re-development within existing urban areas and to provide for higher densities within future urban areas” (Objective 1.1). The proposal is consistent with these objectives and with their accompanying strategies.

4.0 TECHNICAL COMMENTS

The application has been submitted to various technical agencies and City departments, and the following relevant comments have been submitted:

4.1 Works and Utilities Department

The Works & utilities Department comments and requirements regarding this application to rezone from RU1 to RU1s are as follows:

4.1.1. General.

The proposed rezoning application does not compromise Works and Utilities requirements.

4.1.2. Domestic water and fire protection.

This development is within the service area of the Black Mountain Irrigation District (BMID). All charges for service connection, and upgrading costs are to be paid directly to the BMID.

4.1.3. Sanitary Sewer.

This property is not currently serviced by the municipal wastewater collection system. This item is under the jurisdiction of the Public Health Officer.

4.1.4. Access and parking.

There is sufficient parking provided on site.

4.2 Interior Health

Until the property is serviced by a community sewer system, Interior Health is unable to provide positive comment to the rezoning proposal. The on-site sewage system is not sized for the additional living unit and there is no temporary solution to the problem.

4.3 Inspections

No concerns.

5.0 PLANNING AND DEVELOPMENT SERVICES DEPARTMENT

The Planning and Development Services Department supports the proposed rezoning of the property from RU1 – Large Lot Housing to RU1s – Large Lot Housing with Secondary Suite. The subject property is designated as Single / Two Unit Residential in the Official Community Plan (OCP). The OCP supports the use of secondary suites as an appropriate method of increasing density in low density areas without a significant impact on the existing neighbourhood. This site in particular has lane access to the proposed suite and parking which should alleviate potential concerns regarding excess parking in front yard areas.

The property is currently not hooked up to a community sewer system and the on-site septic system does not meet the capacity required for the secondary suite. Interior Health is therefore unable to support the application at this time. The subject property, however, is in Zone A of the North Rutland Sewer Specified Area No. 20 that is scheduled for connection to the sewer system in the fall of 2003. Staff therefore recommend that the application be supported and held at third reading until such time that connection to the sewer system is complete.
