CITY OF KELOWNA

MEMORANDUM

---

**Date:** April 16, 2007  
**File No.:** 1970-01  
**To:** City Manager  
**From:** Financial Planning Manager  
**Subject:** 2007 Tax Distribution Policy

---

**RECOMMENDATION:**

THAT Council approve a Municipal Tax Distribution Policy for the year 2007 that will result in a modification of the 2006 Tax Class Ratios to reflect the uneven market value changes which have been experienced between property classes, as follows:

<u>Property Class</u>	<u>Description</u>	<u>2007 Tax Class Ratios</u>	<u>2006 Tax Class Ratios</u>
01/08	Residential/Recreation/Non-Profit	1:0000:1	1.0000:1
02	Utilities	6.1489:1	5.0786:1
04	Major Industrial	3.6042:1	4.2338:1
05/06	Light Industrial/Business/Other	2.5900:1	2.5999:1
09	Farm Land	.1408:1	.1196:1
91	Farm Improvements	.5114:1	.5311:1

AND THAT Council approve development of 2007 tax rates to reflect the 2007 assessment changes in property market values.

**BACKGROUND:**

The 2007 assessment roll is based on market values established on July 1, 2006. The market value change to assessments is outlined in the following table:

<u>Property Class</u>	<u>Description</u>	<u>Market Increase (Decrease)</u>
01/08	Residential/Recreation/Non-Profit	21.1%
02	Utilities	0.0%
04	Major Industrial	42.3%
05/06	Light Industrial/Business/Other	21.6%
09	Farm Land	(6.6%)
91	Farm Improvements	25.8%

Page 2  
Tax Distribution Policy

Market value changes that result in **uneven changes** between property classes **result in a tax burden shift** to the class experiencing greater market value increases unless tax class ratios are modified to mitigate this shift. It has been Council's policy to modify tax class ratios to the extent necessary to avoid such shifts. **Under normal circumstances, this policy provides an effective tax increase that is the same for all classes.** If residential property assessments increase at a much greater rate than other classes there may need to be a change to this policy. Financial Services has expressed concern on this issue previously, but considering this year's market increase for residential and business/light industrial are almost identical, no policy change is recommended this year. The Utility Class 02 is getting close to the maximum ratio that can be used and this may impact the tax sharing in future years. The impact will be minimal due to the small assessment in that property class but there is a Provincial regulation capping the class multiple at 2.5 times the Business property class.

### **Impact on Properties Within Each Property Class**

It is important to be aware that the tax rates established as a result of new tax class ratios are designed to avoid shifts between property classes, however the rates established are based on the average market value increase for the entire class or classes.

**The establishment of tax class ratios that prevent shifts between classes do not eliminate potential shifts within a property class where a property has experienced a market value change that is greater than the average for that class.**

The establishment of modified tax class ratios simply provides a basis for an equitable distribution of general municipal taxes between classes; however the establishment of the **required tax rate** will be dependent on the final tax demand as determined by Council during Final Budget deliberations.

### **Background Information**

Background information, attached to this report, provides additional related information on the following topics:

- The B.C. Assessment Authority and the Assessment System
- The Taxation System
- Historical Council Policy - Tax Class Ratios
- The 2007 Assessment Roll

Page 3  
Tax Distribution Policy

### **Conclusion**

Tax class ratios for 2007 have increased for Utilities and Farm Land while reducing for Major Industrial, Business and Farm Improvements in relation to the residential class. This reflects the market value increase experienced in the residential class in comparison to the change in the other property classes.

## **BACKGROUND INFORMATION**

### **ASSESSMENT SYSTEM/TAXATION SYSTEM**

#### **The B.C. Assessment Authority and the Assessment System**

The B.C. Assessment Authority is an independent body created by the Provincial Legislature and is charged with the responsibility of preparing an Assessment Roll for all of the properties in British Columbia.

Taxing authorities, at various levels of government (e.g. Provincial, Municipalities, Regional Districts, Hospitals, School Districts) use the Assessment Roll to assist them with the distribution of the taxes required to operate their corporations.

July 1<sup>st</sup> is the assessment valuation date for properties listed in the assessment roll.

Although the Assessment Roll preparation is the responsibility of the Assessment Authority, for use by various taxing jurisdictions, B.C. Assessment has nothing to do with the actual levying of taxes, other than for its own operating levy.

#### **The Taxation System**

City Council is responsible only for the General Municipal portion of the property taxes appearing on the Kelowna tax bill that is sent to property owners in May of each year. The City of Kelowna is responsible for the billing and collection of taxes levied by other taxing jurisdictions such as the School District, however **City Council has no direct control over these levies.**

The General Municipal tax levy is the City's primary revenue source which is used to pay for the services that it delivers to its citizens such as fire and police protection, street and parks maintenance, library, new road construction, etc.

The provision of water, sewer and electrical services is funded by way of user rates. These costs are not included in the general municipal tax levy.

The Assessment System managed by B.C. Assessment and the Taxation System managed by the City of Kelowna are two separate systems, subject to different Acts of Legislature and meant for two different purposes.

Over the years, the taxation system has changed substantially and has been constantly reviewed and amended by the Province in an attempt to provide a more equitable and understandable method of sharing the taxation requirements within each municipality.

Prior to the present system, which provides the authority for Municipalities to set the tax class ratios, uneven market fluctuations between classes resulted in shifts in the taxation burden from one property class to another.

Tax Class ratios represent the relative tax amounts that each class will pay as a ratio of the residential tax class. For example, if the tax class ratio of the Business to Residential class is 2.50:1 this means that for each dollar of market value the Business Class tax rate will be two and one half times that of the Residential Class.

The ability to establish different tax rates for each class of property means that municipalities can avoid shifts of taxation between classes of property, unless there is a deliberate political decision to do otherwise.

**The differential tax rate powers granted to municipalities are not, however, designed to prevent shifts of taxation between properties within a particular class.**

#### **Historical Council Policy - Tax Class Ratios**

From 1984, when City Council was granted the authority to establish tax class ratios, to 1988, **there was very little market value movement** in the City. As a result there was no need to adjust the tax class ratios to prevent shifts in the tax burden from one property class to another.

This changed slightly in 1989 and the City chose to modify the tax class ratios at that time to reflect the difference in market movement between the residential class and the business class.

In 1991 there was a more dramatic change in the market values of residential property which necessitated a more significant change in the tax class ratios to ensure that the residential class did not experience a greater percentage tax increase, on average, than other property classes that year.

The following is a historical recap of the tax class ratios which were established from 1985 through to the end of 2007 based on market value shifts that occurred during that period (some years are omitted to condense the information):

<u>Property Class</u>	<u>1985</u>	<u>1989</u>	<u>1991</u>	<u>1993</u>	<u>1997</u>	<u>1999</u>	<u>2000</u>	<u>2002</u>	<u>2003</u>	<u>2004</u>	<u>2005</u>	<u>2007</u>
Residential	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00
Utilities	2.21	2.37	3.00	3.27	3.03	3.24	3.38	3.66	3.76	4.40	5.00	6.15
Ind. - Major	1.74	1.86	2.49	3.27	3.20	2.68	2.60	2.68	2.93	3.39	3.97	3.60
Ind. - Light	1.74	1.86	2.40	2.09	2.02	1.92	1.91	2.00	2.04	2.20	2.59	2.59
Business/Other	1.74	1.82	2.06	2.09	2.02	1.92	1.91	2.00	2.04	2.20	2.59	2.59
Rec/Non-Profit	1.00	1.00	.94	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00	1.00
Farm Land	.09	.08	.08	.08	.08	.08	.08	.08	.08	.09	.11	.14
Farm Imprv	.41	.41	.38	.47	.46	.48	.49	.50	.51	.52	.55	.51

**The 2007 Assessment Roll**

The following is the 2007 split between market value increase and new construction as provided by B.C. Assessment:

	<u>(000's)</u>		<u>% Age</u>	
	<u>2007</u>	<u>2006</u>	<u>Market</u>	<u>New Const</u>
Res/Rec/Non-Profit	15,746,738.8	12,350,128.0	21.11%	6.40%
Utilities	13,436.9	11,921.5	0.02%	12.69%
Major Industrial	25,012.0	17,581.9	42.26%	0.00%
Light Ind/Bus/Other	2,601,002.1	2,041,838.4	21.57%	5.82%
Farm Land	21,761.3	23,268.1	-6.64%	0.17%
Farm Improvements	205,847.8	158,277.1	25.77%	4.29%
Totals	18,613,799.0	14,603,015.0	21.19%	6.28%

The 2007 Assessment Roll includes a total of \$917.1 million in new construction values added and summarized as follows:

	<u>(million's)</u>	
01/08	Residential/Recreation/Non-Profit	\$789.9
02	Utilities	1.5
04	Major Industrial	0.0
05/06	Light Industrial/Business & Other	118.8
09/91	Farm Land/Farm Improvements	6.8
	Total	917.1
