CITY OF KELOWNA

MEMORANDUM

---

**Date:** January 20, 2009  
**File No.:** 6120-20  
**To:** City Manager  
**From:** Director, Infrastructure Operations  
**Subject:** New Off-leash Dog Parks

Report Prepared by: *Mark Tompkins, Parks & Community Relations Coordinator*

---

**RECOMMENDATIONS:**

THAT Council approve an off-leash dog park within the designated area of Duggan Park (Map 15) for small dogs;

AND THAT Council approve on a temporary basis an off-leash dog park within the designated area of Rutland Recreation Park (Map 16) until such time the land is needed to accommodate other park needs;

AND THAT Council approve an off-leash dog park on Knox Mountain Park (Map 17) on a one year trial basis;

AND THAT Council not approve an off-leash dog area on a trial basis within Kinsmen Park (Map 14);

AND THAT the grassed field area within the former Kelowna Secondary School site (Map 18) be used on a trial basis between April 15, 2009 and October 15, 2009 as an off-leash dog park and that staff report back to Council on the results of the trial;

AND THAT Council Policy 258 Dog Walking and Dog Off-Leash Parks be amended to reflect the additional off-leash dog parks identified in the report of the Director, Infrastructure Operations dated January 20, 2009.

**BACKGROUND:**

At the regular meeting of City Council held April 7<sup>th</sup>, 2008, City Council approved adding 14 new parks as on leash dog parks and on a trial basis between May 15 and September 15, 2008 designated a portion of 3 parks (Duggan, Rutland Recreation and Knox Mountain) as off-leash. Kelowna currently has 65 dog on leash parks and 5 dog off leash parks.

Parks staff also proposed on a trial basis between May 15 and September 15, 2008 a portion of Kinsmen Park as off-leash but City Council deferred pending a report back following input from neighbours, the Kinsmen Club, other organizations and the public.

Two on-line surveys were conducted by the City of Kelowna; one for Kinsmen Park and one for Rutland Recreation, Duggan and Knox Mountain Parks. Approximately 400 responses were received

for the Kinsmen survey and 200 for the other on-line survey. Kettle Valley Research compiled the results on behalf of the City of Kelowna. The surveys were developed to collect public input efficiently; they are not statistically valid.

### **Knox Mountain Off- Leash Dog Park**

Ninety per cent (90%) of respondents supported the designated off-leash area in Knox Mountain Park.

During the trial period, Parks only fenced along Knox Mountain Drive as a cost saving measure. However, the need to fence along the top of bank was confirmed by the on-line survey. Therefore if the portion of Knox Mountain Park was approved as off-leash, Parks would fence the top of bank if permissible. Parks is also recommending that the Knox Mountain Park off-leash area be approved on a one year trial basis as some pedestrians have requested the fence be moved further from the road to improve safety for pedestrians. The fence was purposely set a minimum of 1.5 metres from the road to provide an area for pedestrians. Additional land may be conducive for on road parking creating a hazard for pedestrians and vehicles even if the road was signed no parking. In addition, the area for off-leash dogs is already narrow and shifting the fence further would create an area too narrow for an off-leash dog area. Recent measurements show that the area from the asphalt road to the fence is a minimum of 2 metres which Parks believes is safe. The area between the road and the fence may need to be graded to provide a more level surface for walking. Extending this trial for another year would give Parks sufficient time to determine if this area is suitable as an off-leash area while not creating a safety hazard.

The designated area was initially proposed by the Friends of Knox Mountain.

### **Rutland Recreation Off-Leash Dog Park**

Ninety six per cent (96 %) of respondents supported the designated off-leash area in Rutland Recreation Park. The trial was successful and supported by the community in this area. Parks is recommending this area be approved as an off-leash dog park on a temporary basis as this area may be required in the future for additional parking, a playground or field expansion.

### **Duggan Off-Leash Dog Park**

Parks administered a survey to home owners adjacent to Duggan Park in 2007. The surveys were hand delivered to more than 40 homes; 12 responses were received with 6 in favour of the small off leash Dog Park and 6 opposed. Of the 6 opposed 4 were concerned about dogs and traffic. The trial included fencing the small dog area to prevent dogs from running into traffic.

The off leash trial was implemented in 2008 and ninety-five per cent (95%) of respondents supported the designated small dog off-leash area in Duggan Park. Only 3 surveys were received by residents living immediately adjacent to Duggan Park. One resident supported the small dog area, one resident did not support the small dog area and the third resident was neutral. As the trial was successful and supported for the most part by the public, Parks is recommending that the designated area within Duggan Park be approved as an off-leash dog area for small dogs.

### **Kinsmen Off-Leash Dog Park Trial**

As directed by City Council, Parks solicited public input to see if Kinsmen Park would be appropriate for an off-leash dog park trial with access to the Okanagan Lake. Currently the only public access dogs have to Okanagan Lake is the off-leash dog beach at Cedar Creek Park.

Ninety three (93 %) per cent of respondents living within 100 metres of the park opposed the proposed trial while thirty-seven per cent (37 %) of community at large respondents opposed the trial. It should be noted that support for the off-leash trial was strongly polarised by whether or not respondents owned a dog or lived near Kinsmen Park.

Reasons respondents did not support the off-leash dog trial at Kinsmen Park included limited beach access for people, special access to the lake for dogs, irresponsible dog owners and disruptions to wildlife (bird sanctuary). Parks staff also requested input from the Kinsmen Club, Naturalist Club and the City's Environment Division. The Naturalist Club (Enclosure I) and the Kinsmen Club (Enclosure II) did not support an off-leash dog park trial at Kinsmen Park. The City's Environmental staff also did not support the use of a portion of Kinsmen Park as dog off-leash given its potential impact on the Maude Roxby Bird Sanctuary. Therefore Kinsmen Park should not be approved on a trial basis as a dog off-leash as this park is near an environmentally sensitive bird sanctuary.

It should be noted that seventy-eight (78%) of respondents supported additional access to Okanagan Lake on City-owned land. Not surprisingly, dog owners were significantly more likely to support additional dog access to Okanagan Lake (93 %) compared to only 50% of non-dog owners supporting additional access. After reviewing all beach accesses and beach parks staff have determined there is no appropriate area to provide additional access to Okanagan Lake within the City's current inventory.

### **Central Green Off-Leash Dog Park Trial**

The former KSS site which is City owned and also known as Central Green is currently undeveloped. Prior to development of the site, portions of the property are used on a temporary basis to fulfill various civic needs. As development is not expected to occur over the next two years Parks would like to use a portion of the site for an off-leash dog park including a separate area for small dogs between April 15, 2009 and October 15, 2009. During the trial period, we will seek public input and report back to City Council after the trial period.

**INTERNAL CIRCULATION TO:** City Clerk

**EXISTING POLICY:** BYLAW NO. 6819-91

### **FINANCIAL/BUDGETARY CONSIDERATIONS:**

There is sufficient capital budget to implement these changes in 2009.

**EXTERNAL AGENCY/PUBLIC COMMENTS:** The Regional Dog Advisory Committee supports the addition of more off-leash parks.

### **COMMUNICATIONS CONSIDERATIONS:**

Update dog park list on website

Issue news release

Include in Council Highlights

Send letter to appropriate Residents Associations, Kinsmen Club, Naturalists Club and Dog Owner Association

**Considerations that were not applicable to this report:**

**PERSONNEL IMPLICATIONS:**

**LEGAL/STATUTORY AUTHORITY:**

**LEGAL/STATUTORY PROCEDURAL REQUIREMENTS:**

**ALTERNATE RECOMMENDATION:**

**TECHNICAL REQUIREMENTS:**

Regarding: Trial off-leash dog park proposal at Kinsman Park

Dear Ms. Stephens:

The Cental Okanagan Naturalists' Club adamantly opposes the proposal to establish an off-leash dog park area in Kinsman Park primarily due to its immediate proximity to Mud Bay and Maude-Roxby Wetland. As you are no doubt aware, our club has contributed many hours of volunteer labour and worked to raise funds to help the city create nearby Maude-Roxby wetland as a preserve for wildlife. One of the main reasons this area was favored as a wildlife sanctuary was the variety and abundance of birds that would stop to rest and feed in the adjacent shallow bay on their northward and southward migrations. Though small, the area is vital wildlife habitat, uncommon on Okanagan Lake, enabling many bird species that we would otherwise not see to migrate through our area. The combination of resident and migrant bird species is enjoyed by many people throughout the valley, from Winfield to Peachland, because of its notable diversity.

Dogs are very alarming to many bird species, so just their presence nearby would seriously negatively impact the abundance and variety of birds in Mud Bay. We therefore think it would be extremely harmful to the value of the marsh and bay for wildlife to allow dogs off-leash anywhere near this regionally significant important bird area. Members of our club have marveled at observing over 180 bird species in this area over many years. Some of these sightings are very rare, while many uncommon species, such as Trumpeter Swans and White Pelicans, are observed in Mud Bay year after year. Attached is a partial list of the bird species observed at various times of the year. We are gathering together a more comprehensive list which will be forwarded to you soon.

Please preserve the vibrancy of Mud Bay and the Maude-Roxby wetland by locating any off-leash, aquatic dog parks well away from this important bird area. The latest IUCN Red List (see <http://cms.iucn.org/index.cfm?uNewsID=947> ) reports many bird species in decline and distress due to climate change and habitat impacts: lets' continue to support their survival by ensuring our activities respect their needs. This will keep the birds coming to our doorstep, where many people can observe and enjoy them. Birding is a growing element of tourism which this area readily supports. Adding the pressure of dogs on land and/or in the water would be one more cumulative impact which could push the wildlife species using the bay over the edge.

The Central Okanagan Naturalists Club would like to see the Kelowna Parks Department create more bird habitat on Mud Bay by replacing the concrete wall along the lake in Kinsmen Park with riparian vegetation, once this structure is no longer viable. There is also potential to add a bird blind so park users can enjoy viewing the diverse wildlife in the bay without disturbing them. We would like to explore these possibilities with parks staff.

Despite having a no dog designation at the Maude-Roxby Wetland, the Francis Avenue beach access and Kinsmen Park, people are regularly observed letting their dogs loose to chase the birds in Mud Bay. More enforcement is necessary!

We implore the Mayor and Council of the City of Kelowna to reject this proposal as being incompatible with the wellbeing of the wildlife sanctuary it borders on. Please keep us informed of your decisions, plans and actions with regard to the Kinsmen Park, Maud-Roxby Wetland and the Mud Bay area.

Yours Sincerely,

Don Guild, President

ENCLOSURE II

May 26, 2008

CITY OF KELOWNA  
1435 Water Street  
Kelowna, BC V1Y 1J4

Attention: Carla Stephens

Dear Carla:

On behalf of the Kinsmen Club of Kelowna, I would like to relay to City council our opposition to the proposal of sectioning off an area of Kinsmen Park on Abbott Street as a dog park. Our club has had much debate amongst our members; we have received several pieces of correspondence from concerned residents of Kelowna and we have approached the senior members of our K40 Club (who were involved in the original opening of Kinsmen Park). We have been hard pressed to come up with arguments in favor of creating a dog park area within Kinsmen Park.

When we consider the bird sanctuary close by, the beauty of the lake, and the calm, quiet setting of Kinsmen Park which does not have the hustle and bustle of a beach area like Gyro or Rotary Beach we feel this is an inappropriate choice for the dog park.

Our motto "Serving the Communities Greatest Need" has been put to the test on this issue. When we consider that no one has approached us in favor of the dog park and that the Club has received numerous emails, letters, etc that are opposed to the dog park, we believe that we have been diligent in taking our stance against the issue.

Some of our members have dogs of their own, and we all agree that dog parks are beneficial for all residents of Kelowna. They serve to keep our City's other parks, pathways and green spaces clean, fresh and beautiful. We believe that Kinsmen Park is one of those areas which should remain pristine.

In summary, we the Kinsmen Club of Kelowna oppose the dog park in Kinsmen Park.

Yours truly,

KINSMEN CLUB OF KELOWNA

Ron Rodger  
President
