The Single/Two Unit Residential designation covers single detached homes for occupancy by one family, single detached homes with a secondary suite, semi-detached and detached buildings used for two dwelling units, and complementary uses.

5.0 **TECHNICAL COMMENTS**

The application has been submitted to various technical agencies and City departments, and the following relevant comments have been submitted:

5.1 Development Engineering

This development is within the service area of the Black Mountain Irrigation District (BMID). All the fees and charges are to be paid directly to BMID.

The subject property is located within the Local Service Area (LSA) # 20 and has not cash commuted the charge of one SFE for the existing dwelling. The applicant is responsible to cash commute the charges for this development in the amount of **\$4,863.78** for the dwelling and the suite.

Note: Since their comments this portion has been cash commuted.

5.2 Building and Permitting

A building permit is required for suite development to BCBC 2006. Separate heating system required for proposed suite. No concerns with proposed size change.

5.3 Fire Department

Requirements of Section 9.36, Secondary Suites, of the BCBC 2006 are to be met. Fire separations per BCBC 2006. The address for the suite and main house is to be visible from the street.

6.0 COMMUNITY SUSTAINABILITY DIVISION COMMENTS

The Land Use Management Department notes that policies within the Official Community Plan support the sensitive integration of infill into existing neighbourhoods where services are already in place and densification can easily be accommodated. The proposal allows for more efficient use of the subject property and helps to diversify the housing supply in the area.
