Introduction

Osoyoos Lake Water Science Forum 2011
September 18-20, in the Town of Osoyoos.

Conference Theme:

"Shared water, shared future: bridges to sustainability for Osoyoos Lake"

Conference Details:

Coming soon!

Contact:

Mark Colosimo
(ColosimoM@Washington.IJC.org)

Conference Overview:

Osoyoos Lake is a microcosm of global concerns. This beautiful lake spans the Canada United States border in the Okanagan River basin, and has many environmental challenges.

The 2011 Osoyoos Lake Water Science Forum focuses attention on the needs and challenges for sustaining the ecological health of the lake, along with the related well-being of the basin's residents and visitors. It will review progress made since the last Forum in 2007, and science studies related to the renewal of the International Joint Commission's operating orders for Zosel Dam.

Lake sustainability depends on the actions of all who work, live or visit the basin, and all those involved in governance.
