This plan shows one or more witness posts which are not set on the true corner(s).

Distances shown are horizontal, ground-level distances, in metres and decimals thereof.

Integrated Survey Area No. 4, City of Kelowna, NAD83(CSRS) 4.0.0.BC.1.

Grid bearings are derived from plan EPP71339 and are referred to the central meridian of UTM Zone 11.

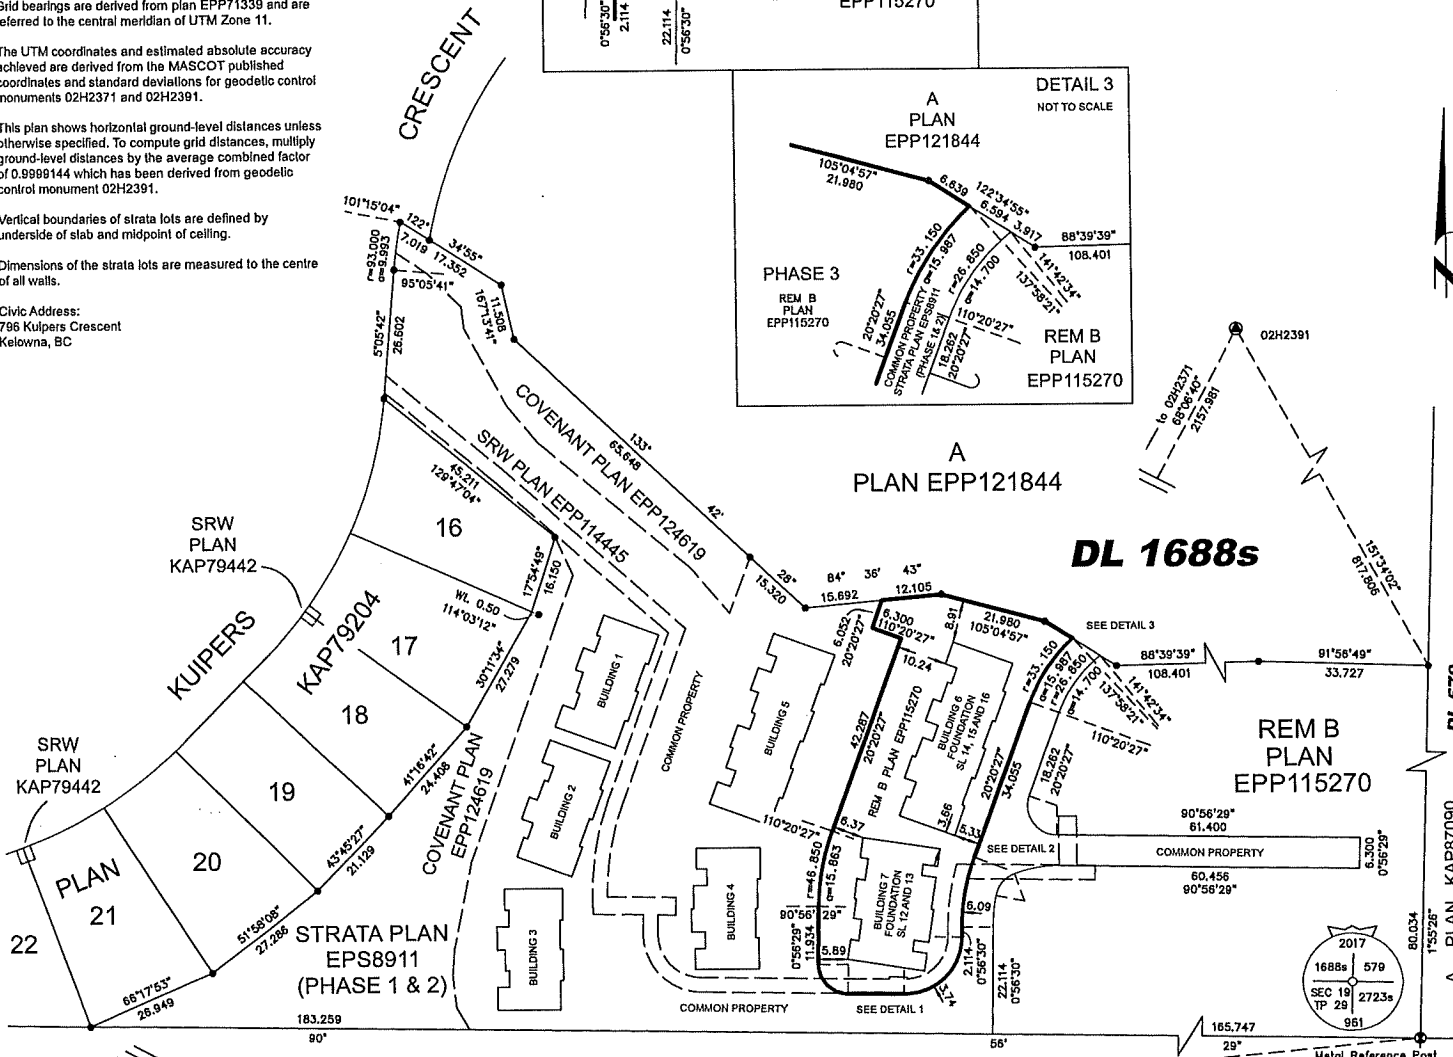

The UTM coordinates and estimated absolute accuracy achieved are derived from the MASCO published coordinates and standard deviations for geodetic control monuments 02H2371 and 02H2391.

This plan shows horizontal ground-level distances unless otherwise specified. To compute grid distances, multiply ground-level distances by the average combined factor of 0.9998144 which has been derived from geodetic control monument 02H2391.

Vertical boundaries of strata lots are defined by underside of slab and midpoint of ceiling.

Dimensions of the strata lots are measured to the centre of all walls.
